## WORK EXPERIENCE

### Associate Software Engineer Sigma Infosolutions Ltd.

07/2022 - 10/2024

Jodhpur

As a Full-Stack Software Developer at Sigma info solutions, I have successfully managed end-to-end development for seven projects, taking full responsibility for all phases from requirements gathering to deployment. My expertise in technologies such as technologies, e.g., JavaScript, React, Golang, HTML/CSS, Node, Redux has enabled me to design and implement user-friendly web applications, develop RESTful APIs, and integrate third-party services. I actively collaborate with cross-functional teams, conduct code reviews, all while utilizing Agile methodologies to ensure timely delivery of high-quality software solutions.

## PROJECTS

### MCA loan origination system

- In this project loan origination system efficiently manage loan application covering everything from customer onboarding and document verification to credit assessment and loan disbursement in this project it give only small business cash advance loan for short term in this project I used react javascript golang html css and aws for hosting

### Personal loan origination

- In this project I used react javascript golang and html css redux technology. This project give only loan like roofing, home essentials repairing and shop repair etc. In this project loan origination system efficiently manage loan application covering everything from customer onboarding and document verification to credit assessment and loan disbursement. and

### Line of credit loan system

- A line of credit is a flexible loan option that allows borrower to access funds up to predetermined limit unlike a traditional loan where you receive a lump sum, line of credit let you withdraw as needed up to that limit. I used react javascript golang html css and redux technology to build and manage this project

### Marriage website, Event website, Ecommerce website, school website, Food Website

- During my internship I worked on these projects. In these projects I worked on mostly frontend part using react javascript html css.
