SKILLS

React   Javascript   HTML/CSS   Mysql
Redux   Golang   Node   Mongodb   MERN

PROJECTS

MCA loan origination system
- Designed innovative features within the loan origination system aimed at reducing manual input errors during verification stages; implemented robust testing protocols which identified three major inefficiencies leading to workflow improvements.
- Engineered a comprehensive solution handling loan applications from initiation to disbursement by integrating technologies like JavaScript, Golang, HTML/CSS, and AWS; improved processing time by 30%.

Personal loan origination
- Developed a **Loan Origination System** using **React.js** , **JavaScript** , **Golang** , **HTML/CSS** , and **Redux** , streamlining loan application processes for specialized loans like roofing, home essentials repair, and shop repair.
- Implemented an **efficient customer onboarding** and **document verification system** , enhancing the user experience and reducing application turnaround time.
- Followed best practices in software development, focusing on **maintainable code** , **scalability** , and **responsive design** .

Line of credit loan system
- Developed and managed a **Line of Credit System** using **React.js**, **JavaScript**, **Golang**, **HTML/CSS**, and **Redux**, offering borrowers flexible access to funds up to a predetermined limit.
- Designed and implemented a user-friendly interface for **real-time fund withdrawals** , ensuring seamless borrower interaction.
- Built backend services to manage **dynamic credit limits** , transaction histories, and real-time balance updates.

Marriage website, Event website, Ecommerce website, school website,Food Website
- During my internship I worked on these projects.In these projects I worked on mostly frontend part using react javascript html css .
